FlyBase is supported by a grant from the National Human Genome Research Institute at the U.S. National Institutes of Health #U41 HG000739. Support is also provided by the British Medical Research Council and the Indiana Genomics Initiative.
Quick Search

**Simple Search**

- Searches text in all report sections.
- Access to all report pages.
- Search is of text string; beware of false positives!

**Data Class Search**

- Search main data classes.
- Search any single data class, or all data classes.
- Robust autocomplete.
- Precise results.

**Specialized Search Tabs**

- Search very specific data.
- Includes our newest data classes.
- Allows complex searches of some data classes.

Report Pages

**Example Report Page**

- Report pages are available for every object in FlyBase, e.g., Genes, Alleles, Controlled Vocabulary terms, etc.
- Use ‘Open all’ to see all the information available and ‘Close all’ to minimize the page.
- Click Help to learn about different fields.

Stocks and Reagents

- Scroll down on any Gene Report for the Stocks and Reagents table.

<table>
<thead>
<tr>
<th>Stocks and Reagents</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stocks Listed in FlyBase (146)</td>
</tr>
<tr>
<td>Genomic Clones (18)</td>
</tr>
<tr>
<td>cDNA Clones (68)</td>
</tr>
<tr>
<td>RNAi and Array Information</td>
</tr>
<tr>
<td>Antibody Information</td>
</tr>
</tbody>
</table>

- Expand any section for links and additional information.

- For example, follow the BDGP DGC clone link to order this clone from the DGRC (via the “Linkout” section on the next page).

Stock Collections Link

- View a complete list of Stock Collections by following the link in the top dropdown menu.
