Introduction

Video tutorials represent a fast and easy way to get an overview of something you wish to know about. In the last FlyBase Community Advisory Group (FCAG) survey, many of you said that you would like to see more video tutorials available in FlyBase. In response to that, we have made four new videos, which you may want to have a look at to get a sense of what they are. To see the videos, please visit our YouTube channel ‘FlyBase TV’.

We have generated two Basic Navigation videos, to help new users navigate FlyBase ('How to find all data related to a gene' and 'How to generate an excel file of all alleles of a gene'). In addition, we have made a couple of videos on more specific topics ('Author Guidelines' and 'How to cite FlyBase').

We intend to make subsequent videos on the various tools in FlyBase, and we would like your help to prioritise which videos would be most useful. We would also like to know what you think of the format of the current videos.

The aim of this survey

In this survey we want to find out which FlyBase tools would be most useful to have a video about. Also we want to know what the users think of the format of the current videos.
Questions Part I: Tools in FlyBase

Question 1
FlyBase features a vast array of tools to assist users in the generation of novel data. Some tools are more intuitive than others. We are interested in knowing which tools you would most like to see a video tutorial about. Of the options listed below, pick the tools you would most like to see a tutorial about (a maximum of THREE):

Results

Question 2
Two of the videos we have created so far (‘How to find all data related to a gene’ and ‘How to generate an excel file of all alleles of a gene’) have focused on how to find a specific piece of information in FlyBase using the available tools. An alternative format for the videos would be to show you all of the features of a particular tool. Which of these formats would you prefer (choose ONE):
